# What was the proportion of each category in family movies in 2005 ?

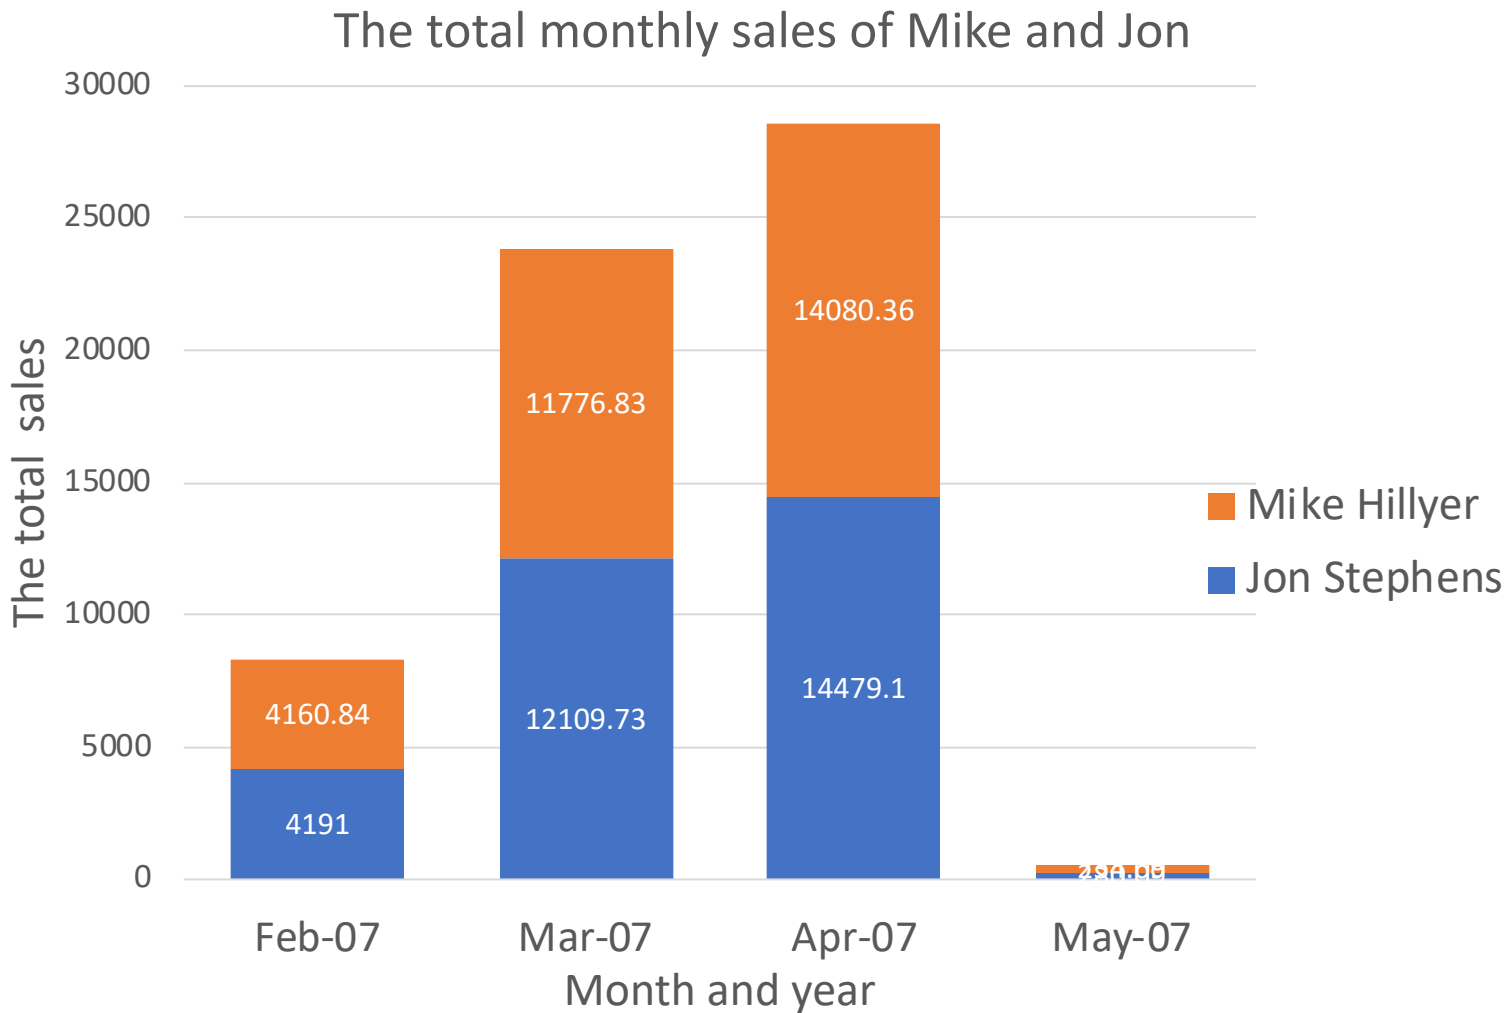

The proportion of each category in family movies in 2005

As we can seen from the chart, the proportion of each category was almost equivalent.

However, take in consideration that the database only contains data from 2005.05.24 to 08.23, thus not displaying the whole of 2015.

What were the total monthly sales per staff member?

The total monthly sales of Mike and Jon

The total sales

|	Mike Hillyer	Jon Stephens
Feb-07	4160.84	4191
Mar-07	11776.83	12109.73
Apr-07	14080.36	14479.1
May-07		

Month and year

As we can see from the chart, the total monthly sales of two staff were comparable.

Jon was slightly better than Mike.

What was the distribution of all the orders across the world ?

Global rental orders distribution

Number of orders

1572

18

As we can see from the chart, the top countries with the big quantities of orders are : India, China, United States, Japan and Mexico.

We can easily find out the number of orders is positively correlated with the population, thus adding more Hindi or Chinese movies on the website might be a good idea.

What were the quantities of orders for the monthly top three countries?

The amount of orders for the monthly top three countries

As we can see from the chart, the top three countries (in terms of order quantity) were always India, China and USA.

During each month unit, the total amount of orders from India and China didn't differ much.
